

# CURBS

for waterproof flat roofs

CUSTOMISABLE SIZES AND FINISHES ✓

GREEN: MADE OF STEEL, A HIGHLY RECYCLABLE MATERIAL ✓

Curbs, designed to be assembled on-site, for installation on flat roofs, are made of C-section steel sheets with chromatic finishes. The height and polyurethane insulation panel can be customised based on project requirements. The curb is designed in 3D to accommodate both monolithic and continuous skylights, ensuring efficient packaging and transportation. Fittings and step-by-step assembly instructions are always provided.

IMPORTANT: To ensure water tightness, it is important to fold the waterproofing material over the support.
