

CURBS

for a curved panel with an internal flat panel connection...

COUPLING WITH ANY SHEET METAL CURVATURE ✓

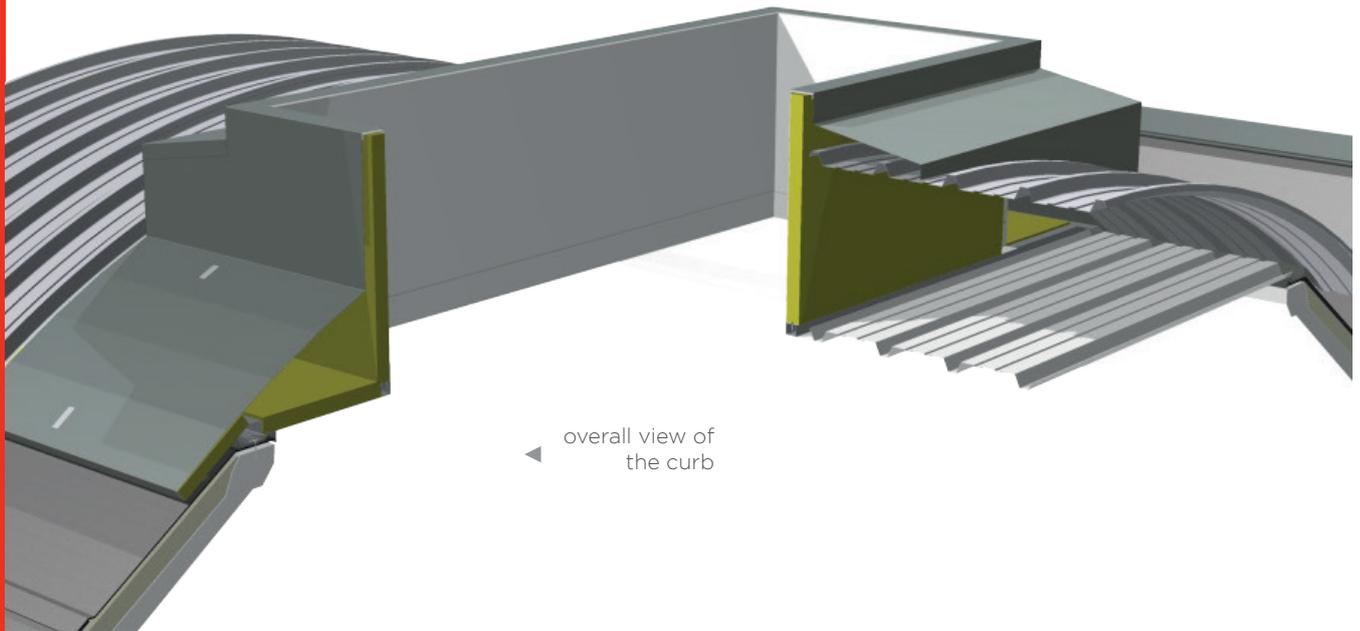

**DESIGNED IN 3D
FOR A PERFECT FIT** ✓

Curbs, to be assembled on-site, made with a C-shaped section of steel sheet with chromatic finishes. The height and insulation panel in polyurethane can be customised according to project requirements.

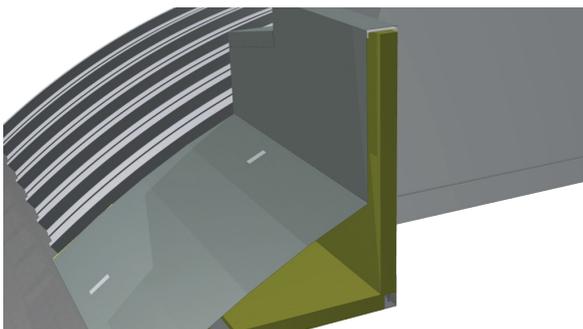

In order to ensure optimal performance, each curb is meticulously designed in 3D and constructed with provisions for securely attaching the C-section to a flat crossbar made of tubes. The curb is supplied complete with an external closure lining.

The on-site assembled curb ensures optimization of packaging and transportation. Fittings and step-by-step assembly instructions are always included.
